[Is This RAD Waste Outside the Fence Line at WLL.docx](#)
[Ford Property Summary Version 03a.docx](#)
[EMSI to EPA 1999 Letter 40273136.pdf](#)

Debbie and Sarah,

I have attached photos of the Ford Property from Google Earth that appear to have been taken in 2010. They clearly show mounds of soil in a trucking company parking lot outside the West Lake Landfill fence line. I believe this is the same material that Paul Rosasco referred to at the CAG Technical Committee meeting in September 2013 as being from Area 2 erosion that had been scrapped and pushed into mounds by the parking lot tenant and/or owner.

I have attached a 1999 request from the EMSI representing the PRPs warning that it was "time-critical" to remediate this material.

Please let us know if this is indeed radioactive materials and, if so, how soon it will be remediated.

Thank you for your prompt attention to this matter.

Sincerely,
Harvey

Subject: WLL Ford Property

Debbie,

I hope you and Ben had a good trip to St. Louis and back. I believe the meeting was worthwhile.

We had spoken about the Ford / Crossroads property and some radioactive materials that have leaked from Area 2 onto it that are still there today. At that time, I believe I committed to sending the information I have on to you and Sarah.

Sarah,

One of our constituents has some recent photos showing that the radioactive material that seeped onto the Ford Property years ago has not been remediated and is still there. I will forward these as soon as I receive them.

I expect to have them later today or sometime tomorrow.

In the meantime, I have attached the documentation I received along with a narrative of my conversation with Paul Rosasco at a recent CAG Technical Committee meeting confirming this.

Your assistance in this matter is appreciated,

Harvey
